

About High Mowing Organic Seeds

High Mowing Organic Seeds began in 1996 with 28 varieties and the goal of leveraging seeds to make our world a better place. Thanks to the passion and dedication of organic farmers and gardeners, High Mowing has grown exponentially. We are active leaders in the sustainable food movement, trialing nearly 850 varieties each year, vetting new varieties for organic growers, and pursuing the highest standards for organic seeds. We believe in an inspired view of the future based on better stewardship of our planet and food systems and are dedicated to doing our part to see it through.

100% Certified Organic & Non-GMO Project Verified Seeds

Why Choose Organic Seeds?

When you choose to buy organic, non-GMO seeds you are supporting:

- A safer ecosystem for the bees and other insects that pollinate a third of all food on earth
- Family farms that grow our professional-grade organic seeds
- Agricultural practices that result in healthier soil, water and communities

But do organic seeds really make a difference in your garden? Yes! When we grow organic seeds, we're selecting for plants that thrive in organic growing conditions.

- Organic, non-GMO seeds are adapted to thrive when they receive organic inputs like compost
- Conventional and GM seeds are adapted to thrive when they receive synthetic chemical fertilizers, pesticides and fungicides

We believe that organic, non-GMO gardens should start with organic, non-GMO seeds.

With so many GM crops now on the market and the increased risk of Pollen Drift, organic farmers have to work harder to avoid contamination. To mitigate this risk, we've had all of our seeds third-party verified by the Non-GMO Project, giving you the highest level of confidence that our seeds are non-GMO.
